25X1A

[redacted]

6. Richard Arens, House Committee on Un-American Activities, telephoned pointing out that they had held hearings relating to Communist schools in the U. S. and as part two they were going to do the same thing for schools abroad. They hoped that we might be able to provide a witness to assist them in this.

Arens also mentioned a January report which dealt with patterns of Soviet espionage. They hoped to do a new study dealing with the techniques of Soviet espionage. He mentioned such things as bugging, codes, short wave receivers and transmitters and other techniques. Arens' request was that our library facilities be made available to one or two researchers to give them background in this subject. Mr. Arens was advised that I would call him on both of these.
